

ORB-R-RS2-F-TA

Product Description

The Orbital RS2-TA is a simple one way disabled refuge and toilet alarm system. The combined master panel has a call indication for the disabled refuge and an alarm indication for disabled toilet. The master panel can answer or call out automatically to the disabled refuge location by lifting the master handset. Once connected a clear full duplex audio conversation can take place. The call is ended by replacing the master handset. The system outstation is radially wired in '2' core '1.5mm enhanced fire rated cable. The toilet alarm can be either wired to the disabled refuge outstation or master panel in a non fire rated '2' core cable. Battery support 24 + 3 hours. Fully compliant to BS5839 Pt9 and CE 2012 certified. With flush mounting back box.

Dimensions
