

ORB-R-RS2-F-TA

Product Description

The Orbital RS2 is a two way combined disabled refuge and disabled toilet alarm system. Stainless steel flush enclosure with black screen print. The master panel can answer or call out by pressing the separate call switches and indications for each disabled refuge location. Once connected a clear full duplex audio conversation can take place. The call is ended by replacing the master handset. The disabled refuge outstations are radially wired in '2' core '1.5' mm enhanced fire rated cable. A volt free changeover contact is provided for remote call in, toilet alarm and fault reporting. A fire panel inhibit input is also fitted as standard. Battery support 24 + 3 hours. Fully compliant to BS5839 Pt9 and CE 2019 certified. Two individual blue toilet alarm LED indicators are combined onto the master panel. A simple two core cable should be wired from the disabled toilet PSU/Sounder unit to the nearby disabled refuge outstation. The refuge outstation and master panel back box is supplied with terminals for these connections.
